

CIMPL

Founded in 2000, Cimpl is leading the revolution of IT, telecom and cloud expense management. We help companies manage the costs of services associated with mobility, fixed telecom, cloud, M2M, IT, and UC assets. Privately owned and headquartered in Montreal, Canada, we are growing both in size and scope. Despite global downturns, our staff tripled over the past three years, and we've expanded our mission to lead the enterprise digital footprint management.

We help enterprises go beyond telecom expense management and we've received multiple awards that confirm our status in the industry. As AOTMP's Solution Innovation of the Year Award Winner for 2017, we are an innovative and transformational Technology Expense Management Solution. Our employees are treated like gold – that's how we became and continue to be a top 50 Best Small and Medium Employer (BSME) in Canada. We've given ourselves the mission to lead the revolution IT and telecom management by offering the best managed services and future-proof software. That is how we help companies take back control of their Enterprise Digital Footprint.

SERVICES OVERVIEW

With Cimpl you can expect:

- Industry leading multi-tenant Platform-as-a-Service.
- Roadmap beyond Telecom Expense Management. We don't stop at Telecom Expense Management. We drive transformational changes in telecom and mobility management for our clients, by guiding them through our recommended steps.
- Early and frequent ROI. We configure our service offering to your immediate, and future needs to drive an early ROI.
- Continuous automation. We focus on finding new operational efficiencies for your organization through workflow automation that reduce costs for everyone.
- We show you the value of using our services so you can illustrate a positive ROI to your stakeholders. We detail how much time and money you have saved, and benchmark the accuracy of your inventory.
